## Easydor

Easydor is an eco friendly wireless door operator and also acts as a door closer, which provides easy access into facilities. It is a heavy duty, low energy opener designed for institutional, high traffic manual opening applications.

---

The regenerative drive system charges the internal battery pack, eliminating the need for an electrical power supply. Use Easydor on a door that will be cycled manually approximately 80 times a day and cycled automatically approximately 20 times a day. This product is for interior use only.

- Wireless - no external electrical power supply
- 25 minute simple installation
- Operates up to 113kg doors
- Door mounted – no header
- Adjustable opening/closing force
- No open stop required
- 12 year battery life
- Supplied with two RF push buttons
- Tested to 1m cycles
- CE marked
